

ICOR

International Consortium of
Orthopaedic Registries

ICOR Meeting at AAOS

Objectives:

- Present total joint arthroplasty findings from 8 international ICOR studies including
 - MOM vs metal on HXPLe hip performance
 - Effect of head size in HXPLe
 - Ceramic on ceramic vs metal on HXPLe and ceramic on HXPLe hip bearings with different head sizes
 - Effect of fixation for hips
 - Comparison of fixed vs mobile posterior stabilized and cruciate retaining knees
- Discuss future international registry collaborations
 - Models of international collaboration
 - Enhancing pre and post market assessment and signal detection
 - Future of ICOR
- FDA's pre/post market device assessment strategy
 - Role of national and international registries
 - Development of U.S. network of registries
 - Infrastructure for post-market surveillance
 - Lay groundwork for clinical trials and venue for IDE studies
